# THE DOCTORS

# TESTIMONY

## **SALON BUSINESS OWNERS**

Maria Estasy, Advanced Cosmetic Nurse. A National Medical Affairs clinician at Evolus, is a professional member of our community. Medispa solutions was able to provide her clinic with the latest technology.

"Thank you to Medispa Solutions for providing our clinic with the PDT LEDELUX. This machine is exactly what our clinic was looking for and we weren't willing to settle for anything other than what this machine has to offer. Being FDA, TGA and Medical CE certified means that we can provide its services to our clients in a safe and confident manner"(2024, Maria Estasy).

# 01

## **FACE2FACE**

"CFU-Elife has allowed us to reshape and lift the face. A safe non-invasive procedure that doesn't require surgery".(2021, Face2Face)

# 02

## **TRACEY KEEFE**

"I am lucky enough to have purchased the Renova HIFU machine. Marco and Mariza from the first moment provided support and training".(2020)

# 03

## **VANESSA G.**

"So happy with Medispa Solutions. Their devices are second to none." (2020,Vanessa Grech).

# 04

## **BRYAN**

"I was at the Med Tech Symposium in Sydney back in June and was extremely pleased. Highly recommend this company."(2020,Bryan K.)

We at Medispa solutions believe in creating solid foundations with our clients.

# THE POWER OF CFU ELIFE

CFU Èlife device originates from the HIFU (high intensity focused ultrasound) technology that has been used for years to treat tumors. With the use of thermal energy, it creates a precise focal distance by an ultrasound wave transducer. Providing a variety of features varying from center less: selective thermal effect, dynamic cooling; among other features that can be used for both medical and aesthetic use.

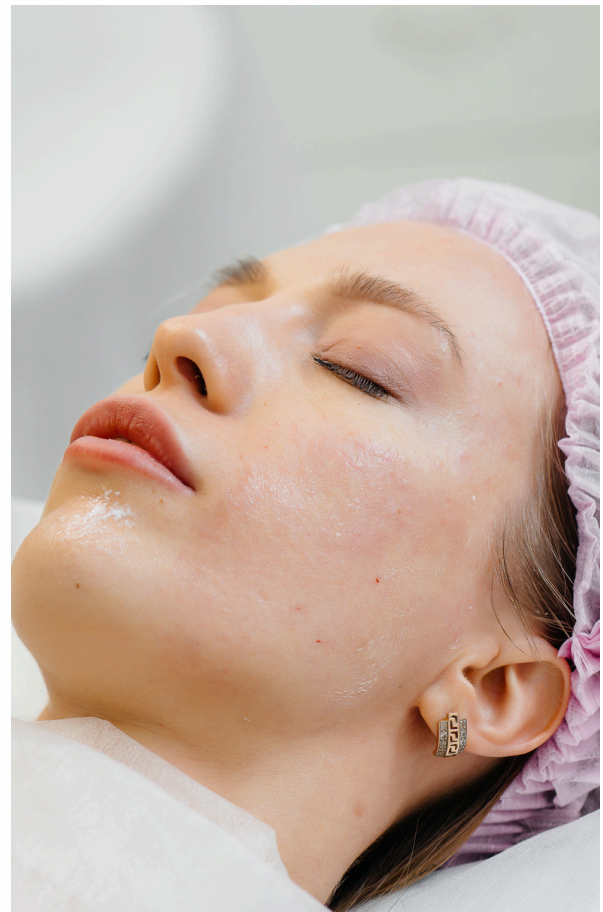

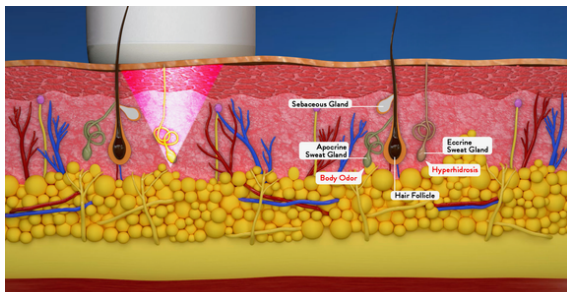

The treatment uses focused ultrasound, which can be customized depending on the needs of each individual. A frequency of 4MHz and a focal depth of 1.5, 3.0 and 4.5mm is used for the face.

All the while, the aesthetic treatment of adipose tissue to minimize the volume ultrasound emits a frequency of 2MHz and various depths from 6 to 13mm.

# Effective Non-Invasive Technology

The treatment depth and intensity is regulated by the practitioner to achieve specific outcomes in both medical and aesthetic protocols. The focused ultrasounds penetrate the area to be treated exclusively at the chosen focal distance

## Medical Treatment of Hyperhidrosis

Focused ultrasound used to treat both the eccrine glands, and the apocrine glands. Quick and painless treatment, without the use of toxins, without side effects, achieving immediate improvement with lasting results.

# Equipment of the Future

**COAXMED**

**LEDELUX**

**LYSI-WAVE**

# THE RISE OF LEDELUX

Medical Grade LEDelux from Medispa Solutions has a high powered LED technology with over 2,000 watts. This unique piece of equipment also has 12 presets for each skin condition; wound treatments, wrinkles etc. LEDelux also allows to create your own settings. Allowing you to combine from the 5 infrared colors.

LED therapy uses both visible red (red light) and infrared (visible light) energy to stimulate your body's own regenerative metabolism at cellular level (ATP), LED therapy provides energy that your cells can use to accelerate the production of collagen and elastin.

This unique machinery has a robotic arm which is a favorite among practitioners, with a touch of the button LEDelux will move up and down. With a flexible arm reach it allows for the target to be reached without any hassle.

FDA, TGA and Medical CE certified phototherapy system with Non-invasive treatment, safe for all skin types including tanned skin.

# The path *to* MEDTECH

WRITTEN BY  
MARIZA NUTTALL

*M*edtech Symposium 2023 held their 10th annual conference hosted by Medispa solutions in Australia. The four part conference held at the Crown plaza hotel in Coogee Beach in Sydney, was crowded with doctors and Estheticians from all over the world. The MedTech Symposium journey started off with prior online training dedicated to preparation for practical educational live demonstrations.

**L**earning with physical demonstrations is unlike any other form of learning, the guests were able to see the process hands on.

The event of the year in the aesthetic world started off with two days of training, followed by a full day of practical training by the amazing Dr. Gregoris. The event started off on Micro & Macro HIFU, what the industry doesn't inform you about HIFU. Attendees were also able to learn about what areas of the body HIFU works on. The guest speakers had designated time slots which allowed for the attendees to be able to focus on that specific subject. Dr. Gregoris presentation focused skin types, and how they interact with equipment driven treatments. In his presentation he also touched on the use of bleaching activities on the skin and knowing your Fitzpatrick scale.

Laser equipment treatments such as CPL have become a big part of the industry. Medtech Symposium live demos allowed for attendees to be able to see how the equipment is used, and connect with the top professionals of the aesthetic industry.

The topic of this year was to enable clinics to enable clinics to maximize their technologies in their treatment protocols.

Creating a great relationship between client and clinics is an important part of the Aesthetic industry.

Highlights:

MICRO & MACRO HIFU

\* Untold facts about HIFU

\* What areas of the skin HIFU works on
